

Radiation Monitoring

It's as Easy As 1-2-4!

LCS

Presenting next generation contamination monitoring

Berthold Technologies LB 124

Extremely high sensitivity contamination monitor for beta particle and gamma radiation; ideal for nuclear medicine, waste monitoring applications and other laboratories.

- RS232 computer interface facilitates data transfer to host computer
- Large memory to store measured values w/date and time stamp
- Rechargeable Ni MH battery, C cells or AC adapter
- Complex functions for experienced users or supervisory mode for unskilled users
- Lightweight one hand operation
- Large backlit graphic display allows use in poor lighting conditions
- Factory set calibration for over 50 nuclides with programmable values
- Acoustic alarm with vibration option
- Sensitive detector easily allows compliance with new lower limits
